

LITHIUM APPLICATION

CHANGING BATTERIES IS A THING OF THE PAST

Charge your batteries during coffee and lunch breaks with a smart charger designed for Li-ion fast charging. This method can supply enough energy capacity required for work up to three shifts, 7 days a week.

OPERATOR RESPONSABILITY

CHARGING DISCIPLINE

VIGILANCE

WHEN? DO YOU CHARGE?

As soon as the forklift is on stanby, its battery can be connected to a fast charging station. Leave it connected during any down time.

LUNCH BREAKS

COFFEE BREAKS

DOWNTIME

WHERE? TO PLUG

Plug the battery directly to the charging port, make sure the charger is on.

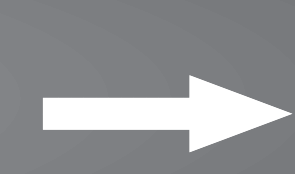

BEFORE! DISCONNECTING

To STOP the charger, press and hold the "UP" button for 2 seconds.

PRESS 2 SEC.

Vigilant and proactive operators at their tasks do not only contribute to their health and safety, but also ensure equipment functions optimally and prevent premature equipment wear and tear. Simply being on the lookout for anomalies (excess heat, connector wear, dust) can prevent accidents or major equipment failure.
